informed him in full of the ABE format and subsequent court procedures should this matter be subsequently charged. **RC-A641** stated that he was a **DPA** and presented as a very inquisitive individual making notes of our conversation. I have not provided details of the investigation or divulged the suspects previous convictions. I only informed him that his name was offered by **RC-A618** as another possible Victim and that Maestri has admitted to certain offences in relation to him when asked in interview. Although asked I did not give any detail of what Maestri has said. **RC-A641** has asked for further time to consider his intentions. He has asked if I am willing to take a call from a barrister friend. **RC-A641** did confirm that he was sexually abused by Mr Maestri but this topic was not discussed in any detail.

I have read the review entered by DS Rigby regarding the position of this case. I concur that there is little evidence in which to proceed and that it does not meet the threshold for approaching the CPS for disposal advice. I await the return of DS Rigby who is currently on a period of A/L in order to clarify if an Mg3 is required.
