20	the vulnerability of [Child] who appears to be easily led due to her own insecurities. Sheila Purvis reports case was referred to one point from GP after mother took [Child] to see GP due to her Risk taking behaviours, Sheila reports this has since been escalated to Family First. [Child] has since disclosed to One Point worker details regarding online incident of seeing 2 males exposing their penis asking her to touch herself and on another occasion asking her to insert a pencil into her vagina, which she did - this is alleged to have been some months ago. It appears [Child] needs support and education around online safety and appropriate and safe behaviours online. Although in the meeting there were no reports linked to [Child] showing on Red Sigma, it appears this has been reported to police for investigation - no SAF has been submitted by
21	young persons behaviour, possible association with criminals, drug use and debts. There is a suggestion he is selling drugs, however there is no evidence to corroborate this or support any higher risk. There is information he is being threatened due to a debt - believed linked to drug use - however young person disputes this. This does not meet the threshold to be scored on the tracker and is to be monitored for any further information which suggests an increase to the
22	medium risk. Scored on tracker at 44. Youth Justice inform an AIM Referral has been received under the concern route, This is to be allocated to a youth justice worker to co-work with one point. [Child] behaviours are more a concern as a perpetrator/exploiter rather than as victim. It is felt this is the best way forward at this time.
23	regarding her attitude and behaviour in the home. Recent escalation in concern due to the recently purchased gifts/underwear - however through investigation this has been addressed. Health present at Triage identify [Child] father as [Name Redacted] (dob uk). To be returned to referred to continue to monitor the situation and further refer if required.
24	lifestyle choices and there have not been any new police reerrals specifically about her since June 2019. She is working closely with her allocated worker also. Case to be monitored. No requirement to share with Erase.
25	and her chaotic home life, which [Child] appears to take advantage of. There is however nothing to suggest she is being exploited or at a higher risk of exploitation. [Child] step mother is also aware of the concerns and is working with professionals to monitor the situation. No requirement to share this referral with Erase.
