

MD - greatest concern as
Collectus responsibility
"o" parents knowledge.

Query whether children
should be tested for HIV
because of events.

SH parents have been informed &
offerd can stilling.

* Medical testing - unsure of
whether this took place * -
need to discuss further.

Only SS involvement MD felt
was a January 9th visit

Became clear after M. Paulton's
appt. during interviews that
RO-A11 was an abuser before
and after entering K.V.S.
No knowledge of being tested
medically.

MD still feels that spontaneity
of event needs to be
questioned.
