

7/
ZRF: September incident was exceptional - though
similar incident some years ago. He is
familiar with boys + background - they were
previously sexually abused.

RO-A10 was difficult to control by all
concerned - place in parental blame to protect himself
others. There is history + context. RO-B363 known
row 3 - led to an incident (RO-B363 a former pupil)

known to E.P.

Other boys brought in. RO-A17 - RO-A16 - no reason
to think either would be involved but accepts M.P.
analysis particularly in respect of RO-A14

Doesn't think active intervention of Child Abuse Team
will be appropriate at this time. Boys' behaviour
is unacceptable to school + parents. School must
deal with the bullying element. At this stage the incident
has revealed a real need. to avoid bullying if a sexual

Issue. Issue is one of professional resources.

Suggests 2 practical attacks

1. Continuation of development started by school
not emphasizing - sexual activities
to rebuild school as community based a trust.
- with Child Protection system close to hand.
2. Take account of resource needs of the school.

D.C. 2nd group - further discussion of P.D. + SSD
- with issues for school to consider

1st group - counselling must go hand in hand
with school strategies + into E.P. Dept.
has to take certain steps.
