Dear [REDACTED]

Re: **Redacted**

As promised, here is my report regarding Redacted future educational needs.

Redacted was referred to the Adolescent Unit by Dr Fraser (Consultant Child and Adolescent Psychiatrist) and following initial out-patient assessment it was decided to admit him to the unit on 12th March for a more intensive period of assessment.

We particularly addressed the issues of his mental state, self esteem, social skills, peer group relationships and psychosexual development.

Redacted

Redacted However Redacted has a vivid internal world and is preoccupied by magical, sexual and horror themes. This was also reflected in his art work. Overall, it was felt that Redacted employed his fantasy experiences to escape from his real distress and difficulties.

Redacted

Within the peer group Redacted exhibited social skills deficits and tended to attract teasing from the other adolescents.

Cont'd....
