

MD - greatest concern is
Collective responsibility
" " parents knowledge

Question whether children
should be tested for HIV
because of events

SH parents have been informed &
offer of care still in.

* Medical testing - unsure of
whether this took place * -
need to discuss further.

Only SS involvement in D John
was a January 91. visit

Became clear after M. Paulone
appt. during interviews that
RO-A11 was an abuser before
and after entering K.V.S.
No knowledge of being tested
medically.

MD still feels that spontaneity
of event needs to be
questioned.
